

YILDIZ TECHNICAL UNIVERSITY
FACULTY OF ARTS AND SCIENCES, CHEMISTRY DEPARTMENT
The First Week Announcements of Service Lesson of KIM1170
General Chemistry Laboratory

1. Each student has to sign and give to laboratory supervisor the lab safety form which reads, in writing with name- surname- student number and date.
2. Attendance compulsion is 80% at least for the applied laboratory lesson in one semester. If a student fails, come in late or not to come in laboratory, they will be treated as failure from the lecture.
3. Make-up experiments will be available for only provided that health reports with the reason of failing to attend and every student has **only a one make-up experiment right**.
4. Students must come to the lab with white lab coat, lab goggles and gloves. If a student does not come to the laboratory with these items, or not to follow the laboratory supervisor rules, they will be dismissed, treated as failure. So they must take the make up exam for this situation or in case of an emergency or unavoidable problems such as an illness requiring hospitalization mainly as mentioned above in explanation 3. But students must never forget to have only a one make-up experiment right.
5. Students must study the experiment they will do according to the experiment cycle or if any preliminary study is necessary to be done, they must prepare it before coming to the laboratory.
6. KIM1170 General Chemistry Laboratory Manual can supply from the bulletin section of the lecture supervisor or etc. in art and science faculty address. General Chemistry Laboratory Manual in Turkish could be bought from the bookstores in Davutpasa Campus.
7. The sections related to students must be filled and pasted his/her last photo to the first page of laboratory manual.
8. The students repeating the laboratory have to come to laboratory and responsible for the 80% attendance compulsion at least as mentioned above in explanation 2.
9. Laboratory experiment group lists were published on www.kml.yildiz.edu.tr at beginning of period. Also it can be followed from the bulletin board of the laboratory.
